Conversational

German - Basic

PROFESSIONAL PROFILE

Dynamic AI & Automation specialist with a strong consulting mindset and 10+ years of experience turning complex business needs into high-impact, production-ready solutions. I combine AI architecture, product development, production understanding, CRM roll-outs, and international delivery experience.

My goal in every engagement is simple: create outsized value and deliver AI solutions that save time, are easy to debug and optimize, and can scale with the business.

CURRENT ROLE

AI Consultant, NORRIQ A/S

2025 - Present

Builds AI apps and workflows, facilitates Claude Code workshops, and advises teams internally as an AI expert. Focused on turning AI from abstract possibility into practical systems that teams can understand, maintain, and improve.

SELECTED EXPERIENCE

2023 - Present

Founder, AI & Automation

Scale By Tech

Designed and delivered OpenAI-powered automations, RAG chatbots, CRM automations, content-generation systems, standalone apps, and front-end tools. Achieved >95% five-star reviews across client engagements.

2022 - 2024

Product Development, UV & IoT

DESMI

Led development of UV systems for aquaculture across product design, CFD optimization, third-party certification, IoT development, forecasting, and foundry collaboration.

2019 - 2022

Inventor

MAXARS

Created specialized production and functional products ranging from production tables and IoT horse trackers to autonomous milling robots.

EARLIER EXPERIENCE

2017 - 2018

Project Manager

ULTRAAQUA

Managed international deliveries from 100K to 2M DKK and implemented Inventor/iLogic product generators plus CFD simulation workflows.

2014 - 2016

Sales Engineer / Designer

ULTRAAQUA

Implemented CRM, handled quotes, managed production and order delivery, exhibitions, and product-line design.

2012 - 2014

Project Manager

Abekatten Klatrevægge

Optimized order workflows, 3D scripts, and documentation, contributing to a 40% increase in profit.

2012 - 2018

Freelance Concept Design / 3D / CNC

Various Assignments

Concept design, 3D printing, CNC machining, prototyping, and hobby product work.

2011

Assistant Teacher

Aalborg University

Helped teach 3ds Max, Rhino, and Revit classes during 7th and 8th semesters.

EDUCATION

2010 - 2012

Master of Science, Industrial Design

Aalborg University

Master project with Bang & Olufsen on wireless speakers and the modern home. Six-month internship in Indonesia at a lamp design firm.

2007 - 2010

Bachelor, Architecture & Design

Aalborg University

Architectural and industrial design projects, Revit building design, and FEM analysis.

AI ARCHITECTURE CAPABILITIES

AI app creation

LLM API systems

RAG chatbots

AI workflow design
